So you can't find betting apps on your android device in 2024? Don't worry, they are easy to get! The most likely answer is you can't see them because they aren't available to download from the Google Play Store. The Android marketplace doesn't allow content or services facilitating online gambling in every country. This isn't too much of an issue as you can still download Android betting apps from third-party app stores and now in most cases from the bookie's mobile site. As the popularity of sports betting apps rises, bookmakers have tried to accommodate customers using Android devices by providing the app directly from their website. Which Bookies Have Android Betting Apps? While some bookmakers aren't providing apps for their customers directly from their website, they should have listed the app on the Play Store for countries where it's available. If you look at our list of Android Betting Apps, you can find guides on downloading and installing apps for each bookie. You can also learn more about How Betting Apps Work from our new guide. If you are unlucky and your chosen bookie hasn't made an app for your device yet, try our guides on adding a bookie's mobile site to your mobile's main screen. It's simple and almost as good as having a proper app. What If Your Bookie Doesn't Have A Betting App For Android? As mentioned above, our guides also show you how to use your bookie's mobile website to create your mobile app. This isn't as good as having the proper Android app, but it creates easy website access for making quick bets on the go. Using the mobile site can save hassle as apps can have usability issues you'll have to live with

until they get updated! Using the mobile site as an app means you don't have to put up with this.

Finding no Betting Apps on Android devices?

One question we see a lot is from people not being able to find any betting apps on their mobile if it's running Android. The main reason for this is usually location. At the time of writing this, the Google Play Store only allows gambling apps for the following countries/regions each with different limitations;

Allowed Countries United Kingdom United States Australia Belgium Brazil Canada Colombia Denmark Finland France Germany Ireland Japan Mexico New Zealand Norway Portugal Romania Spain Sweden

Available Countries & Limitations

Even in these countries, some limitations might exclude many well-known betting apps. These limitations vary for each country; for example in the UK online casino games, sports betting and Lotteries can be listed subject to licensing requirements. For the full up to date list, including each allowed country's limitations Google has them listed on Play Console Help.

Third Party App Stores

If this doesn't help, there are other app stores where you can find available Android apps (or APK as apps created for Android are often referred to). While you can find most betting apps on third-party Android app stores, be careful as they often aren't the official or most up-to-date versions. While it is an option, we wouldn't recommend using these app stores as they can cause big security risks for your mobile device and its data.

Google Play Store & Android Betting Apps FAQ

Q. Why Can't I download betting apps on Android?

A. You can get betting apps on Android devices, just not through the Google play store. The easiest and safest way to get the app is from the bookie's mobile website. To help, we have created individual guides for downloading the biggest bookie's Android apps. Check the links below or select the app you're looking for from the main menu.

Q. Is it safe to download betting apps from unknown sources?

A. It is sometimes necessary to download and install the apps directly from the bookmaker's website. While you have to "Allow installation of applications from Unknown sources" in your phone's settings, be smart when downloading. Directly from a bookies website should be fine, but don't trust 3rd party app stores you've never heard of.

Q. Why won't betting apps work on my phone?

A. There are a lot of possible causes for this; one we see a lot is the app freezing or failing to load up when you are not on Wifi. If this is happening to you, it can be caused by your mobile network provider having adult content controls that are in place to prevent access to adult content. A good safety feature for anyone under 18. If you are over 18 and didn't request this content to be blocked, you can contact your network provider to turn off these controls.
