Epazote has a strong taste and aroma, so not everyone takes to it right away.

It can be somewhat of an acquired taste, but it adds a wonderful rustic layer of flavor to many dishes.

While it is best to use fresh epazote, the dried form can be used if no fresh herbs are available.

The peak season for the herb is in winter, but it is available year-round.

What Is Epazote?

### Descobre um planeta incomum com uma composição semelhante a algodão doce

Uma coligação internacional de astrônomos recently discovered a planet, named WASP-193b, that's about 50% bigger than Jupiter and somehow still the second lightest planet ever found.

But WASP-193b, located beyond our solar system about 1,200 light-years from Earth, isn't just a scientific oddity. The exoplanet could also be key to future research investigating atypical planetary formation, according to a study describing the find that published Tuesday in the journal Nature Astronomy.

### Um planeta semelhante a algodão doce

This cotton candy planet isn't alone; there are other similar planets belonging to a class scientists

facetiously call "puffy Jupiters." The lightest planet ever discovered is the superpuffy Kepler 51d, which is nearly the size of Jupiter but a hundred times lighter than the gas giant.

Puffy Jupiters have largely been a mystery for 15 years, said lead study author Khalid Barkaoui. But WASP-193b, because of its size, is an ideal candidate for further analysis by the James Webb Space Telescope and other observatories.

"The planet is so light that it's difficult to think of an analogous, solid-state material," said Barkaoui, a postdoctoral researcher of Earth, atmospheric and planetary sciences at the Massachusetts Institute of Technology, in a news release. "The reason why it's close to cotton candy is because both are mostly made of light gases rather than solids. The planet is basically super fluffy."

WASP-193b, which researchers think is made up of mostly hydrogen and helium, was a huge puzzle for researchers to piece together. Because the exoplanet's density is so light for its size, calculating its mass became a challenge.

## **Desafio pokerstars mobile android calcular a massa do planeta**

Usually, scientists determine mass using a technique called radial velocity, in which researchers analyze how a star's spectrum, a graph that indicates the intensity of light emissions in wavelengths, shifts as a planet orbits it. The bigger the planet, the more the star's spectrum can shift - but this didn't work for WASP-193b, which is so light, it didn't make any pull on the star that the team could detect.

Because of how small the mass signal was, it took the team four years to gather data and calculate WASP-193b's mass, Barkaoui explained. Because the extremely low numbers they found were so rare, the researchers completed multiple trials of data analysis, just to be sure.

"We were initially getting extremely low densities, which were very difficult to believe in the beginning," said co-lead author Francisco Pozuelos, a senior researcher at Spain's Institute of Astrophysics of Andalusia, in a news release.

Eventually the team discovered the planet's mass is a measly 14% that of Jupiter, despite being so much bigger.

But a bigger size means a bigger "extended atmosphere," said study coauthor Julien de Wit, an associate professor of planetary science at MIT. That means WASP-193b provides an especially useful window into these puffy planets' formation.

"The bigger a planet's atmosphere, the more light can go through," de Wit told **pokerstars mobile android**. "So it's clear that this planet is one of the best targets we have for studying atmospheric effects. It will be a Rosetta Stone to try and resolve the mystery of puffy Jupiters." But it's also not clear how WASP-193b even formed, Barkaoui said. The "classical evolution models" of gas giants don't quite explain the phenomenon.

"WASP-193b is an outlier of all planets discovered to date," he said.

Os cancelamentos vêm apesar da retirada de greve por um dos maiores sindicatos, o SNCTA, que chegou tarde demais para evitar interrupções depois das autoridades francesa na aviação civil pedirem às companhias aéreas a redução do voo

A Ryanair disse que 50 mil passageiros seriam afetados por causa da falha francesa **pokerstars mobile android** proteger sobrevoos – onde aviões voam pelo país sem aterrissar lá - durante a ação industrial.

A maioria dos passageiros afetados simplesmente voaria sobre o espaço aéreo francês a caminho de países como Grécia ou Espanha.

An out is an unseen card that will complete a player's drawing hand or make the hand stronger. For example if you hold A&` K&` and the board reads 3&` 7&` 8&` 2&`e, your outs are any ace or king (making top pair), or any spade (Making a flush). Outs são used in determining a hand's equity
