Reactoonz Slot RTP, Volatility and More

Reactoonz is one of the most popular online slot games in the UK. In this 1 slot game, we're looking at a highly volatile slot, which means that Reactoonz slot may be more suited to more 1 experienced players. Having said so, the Reactoonz RTP of 96.51% is interesting when compared to other similar slots of this 1 kind.

In terms of structure, we're looking at a 7x7 grid that makes use of a Cluster Pays game mechanic to 1 award any potential wins. This implies that rather than relying on paylines, any cluster made up of five or more 1 matching symbols will constitute a win in this Reactoonz game.

Reactoonz Theme – All About Outer Space

This

Reactoonz slot has been 1 designed to look as though the reels are suspended in some sort of quantum machine, with a large three-eyed Gargantoon 1 catching quick bouts of sleep whenever you leave the reels unattended to your right. The background sound effects contribute to 1 this extra-terrestrial experience, with various electronic sounds as well as intelligible blabber that appears to come from some of the 1 colourful creatures themselves.

In terms of design, Play'n GO have done a sterling job in this particular slot, with several features 1 literally setting the grid ablaze and enhancing the interactivity of it all whenever you play Reactoonz online. If Play'n GO 1 casino slots are your thing, you might be also interested in trying out other top titles such as Legacy of 1 Dead, Book of Dead, and Legacy of Egypt.

Reactoonz Bonus Features

Well, well,

where to begin? Reactoonz slot is literally brimming with 1 special features, starting off with the Instability feature that's triggered after any non-winning spin. Here, the Gargantoon is able to 1 drop up to four Wild symbols onto the grid, which are represented by swirling balls of plasma.

Hitting a win will 1 also contribute to your Quantum Queue

which is displayed to your left, accumulating with each consecutive win. Once the queue 1 is filled, then the 3x3 sized creature known as the Gargantoon will appear as a Wild, substituting for all other 1 symbols. In this case, your Gargantoon will split up and

move around with each Cascade, changing from a 3x3 symbol, 1 into two 2x2 Wild symbols, all the way to nine individual Wilds. New symbols will also Cascade down to fill 1 any vacant spots before the Gargantoon makes his next move.

Reactoonz slot also includes a

Quantum Leap feature that charges up 1 whenever you hit a win. Accumulate 25 symbols in this meter and you'll be awarded one of the four Quantum 1 features at random, with up to four features potentially queued up during this time. When no more wins are possible, 1 your Quantum Feature Queue is triggered onto the reels as follows:

Implosion

This is

represented by an Orange Orb and will transform 1 anywhere between three to six symbols into Wilds while destroying all adjacent symbols.

Demolition

This is the Red Orb and

will destroy 1 all one-eyed symbols along with all matching symbols.

Incision

This is the

Blue Orb and will cut a Wild symbol down the 1 centre, creating two intersecting diagonal lines across your grid. In this case, both lines will display matching symbols at random.

Alteration

Finally, 1 we've got the Green Orb that picks out a one-eyed symbol at random and turns it into another.

When you have 1 four matching regular symbols adjacent

to each other in a square shape, the grid will automatically create a Giantoonz, with 1 all wins doubled should this larger symbol form part of a win. Apart from that, you've also got one regular 1 symbol that's marked as a Fluctuating Symbol at random at the beginning of each spin, and marked by a swirling 1 pink and blue glow. Should any of these Marked Symbols form part of a win, then they'll leave two Wilds 1 behind.
